Location: Great Neck, NY

EDUCATION

Hunter College | Bachelor Student

Class of 2026

New York

- Bachelor of Arts in Computer Science **GPA: 3.8**
- Daedalus Honours Scholar in the Computer Science Program
- Relevant coursework: Intro to Python, Software Analysis and Design 1(C++) , Software Analysis and Design 2(C++), Computer Architecture, Software Analysis and Design 3(C++), Computer architecture 2, Practical Web Development

EXPERIENCE

Cognizant | Data Analyst Intern

Jan 2024 - Jan 2024

New York

- Collaborated in a team of five to develop an analytics tool for examining and interpreting viewer engagement with the Customer Exchange video library.
- Employed Python, along with Pandas and Matplotlib libraries to analyse and visualise video viewing data, uncovering key insights into user engagement patterns.
- Worked with team members on the design and implementation of a user-friendly interface, enabling customers to easily access and interpret video analytics through the use of HTML, CSS, JavaScript, and Django.
- Adapted to an Agile development environment, enhancing team efficiency and adaptability to project changes.

Blackstone | Software Developer Intern

Jan 2023 - Jan 2023

New York

- Operated across Blackstone's Technology & Innovations group to learn about and streamline escalations related to critical applications used across Blackstone
- Collaborated with a team of five interns on an API and presented to over 200 employees in the technology department
- Developed an API using React and Python, enabling users to swiftly report and respond to incidents, resulting in expedited resolution of on-call outages and disruptions
- Managed ticket lifecycles using Jira to track issues and potential bugs

PROJECTS

Campus Management System | *Node.js, Express, Sequelize, Javascript, HTML, CSS, React, PostgreSQL*

- Built a RESTful full-stack web application to manage students and campuses with CRUD operations of the database May 2024 - May 2024
- Wrote models, querying a database with Object-Relational Mapping (ORM), designing routes/endpoints and handler functions to process user requests and generate responses
- Created two individual repositories for a user friendly UI and a server-side/API routing with database handling

LEADERSHIP
